JOHN R. MOHLER, CHIEF OF BUREAU.

SERVICE AND REGULATORY ANNOUNCEMENTS.

JANUARY, 1920.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

METHYL VIOLET FOR DENATURING ALCOHOL.

Orders have been issued by the Commissioner of Internal Revenue requiring that methyl violet for use in denaturing alcohol according to Formula No. 33, specially denatured alcohol, must be approved by the Bureau of Animal Industry before use. The collectors of internal revenue are directed to submit samples of methyl violet intended for this purpose to representatives of the Bureau of Animal Industry for approval. Any such samples received should be forwarded to the Washington meat-inspection laboratory, accompanied with a properly executed M. I. Form 161.

NOTICES REGARDING MEAT INSPECTION.

ALCOHOL FOR USE IN PREPARING MEAT-BRANDING INKS.

By regulation of the Treasury Department dated December 1, 1919, the following formula is added to the list of formulas for specially denatured alcohol given in Internal Revenue Regulation No. 30 revised:

Formula No. 33: To every 100 gallons of pure ethyl alcohol of not less than 180 degrees proof, there shall be added 30 pounds of methyl violet.

Use: Meat-branding inks in establishments under control of Bureau of Animal Industry.

The use of inks in which alcohol denatured according to this formula has been used as an ingredient may be permitted.

PAY FOR OVERTIME WORK AT UNOFFICIAL ESTABLISHMENTS.

Legal opinions have been received from the Solicitor of the department to the effect that when it is administratively determined that the services of

bureau inspectors detailed to unofficial establishments in connection with the inspection and handling of boraxed meats for export or to the ante-mortem inspection in public stockyards are essential to the prompt and effective administration of the meat-inspection law, and overtime work is performed by the inspectors so detailed, then the Secretary of Agriculture may with propriety allow pay for such overtime, Sunday, and holiday work. Accordingly the services of bureau employees when assigned to the duties indicated above will be subject to overtime pay under the same provisions that govern overtime pay at official establishments.

WEARING OFFICIAL BADGE.

Hereafter the badge designated in Regulation 6, section 3, Bureau of Animal Industry Order 211, shall be worn over the left breast on the outer clothing of each employee assigned to ante-mortem inspection, post-mortem inspection, reinspection of meat and products, or supervision of preparation, handling, processing, packing, labeling, or tanking of meat and products while in the performance of such duties.

EMPLOYEES PROHIBITED FROM ENGAGING IN POLITICAL ACTIVITY.

The following letter, dated January 15, 1920, has been received by the Secretary of Agriculture from the president of the United States Civil Service Commission, and is quoted for the information and guidance of all officers and employees of the bureau:

"The commission requests that the individual attention of every competitive classified employee serving in the departmental or field service, under your department, be called to the fact that sections 118, 119, 120, and 121 of the Criminal Code (see 35 Stat., 1110) provide in effect as follows:

"That no legislative, executive, or judicial officer or employee shall solicit or be concerned in soliciting or receiving any money or contribution for political purposes from any other officer or employee of the Government; that no solicitation or receipt of political assessments shall be made by any person in any room or building occupied in the discharge of official duties by any officer or employee of the United States; that no officer or employee shall be discharged or demoted for refusing to make any contribution for political purposes; and that no officer or employee of the Government shall directly or indirectly give or hand over to any other officer or employee in the service of the United States or to any Member or Delegate to Congress any money or other valuable thing for the promotion of any political object whatever."

"Section 122 of the Criminal Code provides that—

"Whoever shall violate any provisions of the four preceding sections shall be fined not more than \$5,000 or imprisoned not more than three years or both."

"Under section 1, rule 1, of the civil service rules, competitive employees, while retaining the right to vote and to express privately their opinions on political subjects, are forbidden to take an active part in political management or in political campaigns. This also applies to temporary employees; employees on leave of absence, with or without pay; substitutes and laborers. Under this rule, a competitive employee may attend political meetings or assemblies, as a spectator, but is prohibited from becoming politically active in city, county, State, or national elections, whether primary or regular, or in behalf of any party or candidate, or any measure to be voted upon."

In this connection, attention is called to paragraph 45 of the administrative regulations relating to political activity on the part of members of the Department of Agriculture. These regulations, as well as the sections of the Criminal Code quoted in the commission's letter and the civil service rules referred to, must be strictly complied with.

AMENDMENT TO FISCAL REGULATIONS.

TRANSFER OF PROPERTY OF TRANSFERRED EMPLOYEE.

By Memorandum No. 297 of the Secretary of Agriculture, dated January 16, 1920, and effective January 16, 1920, sections (p) and (r) of paragraph 86 of the Fiscal Regulations, as previously amended, are further amended to read as follows:

(p) An employee transferred from one official station to another for permanent duty when allowed traveling expenses may, within the discretion and under written instructions of the chief of the bureau in which he serves, be allowed packing, crating, freight, and drayage charges for the transfer of his effects and personal property used in official work: *Provided*, That all such shipments are made in accordance with the provisions of section (r) of this paragraph.

(r) Under the provisions of sections (p) and (q)¹ of this paragraph shipments, if by common carrier, must be made on departmental bills of lading, released to the lowest valuation applicable to household goods shipments. The employee to whom such departmental bill of lading is issued is not authorized to make any change therein, by writing across the face thereof or otherwise, which will raise the classification of, or increase the freight charges on, the shipment. Each account must refer to the authority for the shipment and be accompanied by the certificate of the officer best qualified to make it, that the property so shipped consists of the effects and personal property used in official work of the employee transferred and is exclusively his property, and that the transportation was furnished on the occasion of his permanent transfer to a new official station. Carload shipments must be made when the cost at the carload rate is lower than the cost at the less-than-carload rate.

¹ Paragraph (q) relates only to the Forest Service and is therefore not included here.

PURCHASE OF PROPERTY FROM GOVERNMENT EMPLOYEES PROHIBITED.

By Memorandum No. 299 of the Secretary of Agriculture, dated January 24, 1920, paragraph No. 31 of the Property Regulations of this department is amended to read as follows:

31. *Purchase from Government employees prohibited.*—No supplies or property for the use of the department shall be purchased from any of its employees without the approval of the Secretary. The request for such approval must in each case be accompanied by a statement in writing from the officer certifying the voucher showing the necessity for the purchase and indicating specifically that the purchase from the employee will be more advantageous to the Government than a purchase from any other source.

DATA REQUIRED IN RECOMMENDING APPOINTMENTS.

The attention of inspectors and others in charge, making recommendations for appointment, is again called to previous instructions in Service and Regulatory Announcements of November, 1917, and May, 1918, and in Circular Letter 756 dated June 8, 1918, as to the data necessary to be given in such recommendations. A number of recommendations have been received recently which failed to give the dates of birth, and did not give the names of the prospective employees in the forms in which they were signed later in the personal statement sheets and in the oaths of office.

Please read the above-noted instructions again and see that future recommendations are made strictly in accordance therewith.

REPORTING INJURIES TO EMPLOYEES.

In all cases of injuries to bureau employees resulting in any loss of time or where there is a medical, surgical, or transportation expenditure involved which constitutes a charge against the Compensation Commission, officials in charge of field stations are directed to forward reports and claims direct to the United States Employees' Compensation Commission, Washington, D. C.

INSTRUCTIONS CONCERNING MONTHLY TIME REPORTS.

Employees charged with the duty of preparing and rendering monthly time reports T-40 or T-40a are hereby instructed to discontinue the practice of indiscriminately indicating thereon the figure "1" in all spaces, Sundays and holidays included. Sunday and national holiday spaces should be filled in with the figure "1" only when an employee has actually performed service, or with the letter "S" when on sick leave, or with the letter "O" when on leave without pay. The letter "L" should never be entered in Sunday or national holiday spaces, as Sundays and such holidays are not counted as annual leave.

There are occasions when it is absolutely necessary to *know* whether or not an employee performed service on a Sunday or holiday, and the record shown by the time report should be such as will *positively convey this information in all cases.*

The printed instructions at the bottom of time reports relating to use of symbols for denoting the various kinds of information, also those in the heading of leave record columns to the right of the sheet, should be adhered to more strictly. Entries made in the leave record columns should never include

any leave taken during the current month, that is, the month covered by the Form T-10 or T-40a in hand, as such leave is shown in the body of the current report, if any has been taken. If no leave whatever has been taken during the current month the columns for indicating the employee's record of previous leave should be left blank.

Strict compliance with these instructions will facilitate prompt payment of salaries.

TRANSPORTATION REQUESTS AND THE USE OF SCRIP.

When more than one scrip book is purchased at a time from a single appropriation, they should be purchased with a single transportation request, but in reporting the purchase to the bureau a separate Form T-11 should be submitted for each book.

All information called for on Form T-11 should be carefully and completely supplied, particularly the appropriation from which the scrip is to be paid. When a scrip book is purchased from a certain appropriation, the appropriation should be noted on each book and the scrip not used for travel chargeable to another appropriation, except in an emergency. In that event a separate T-12 scrip report in duplicate should be submitted with reimbursement accounts on which the emergency use and appropriation are plainly indicated and explained.

All transportation requests issued by the bureau indicate the appropriation to which their use is chargeable, and a record is made of same. Except in an emergency they must not be used for travel chargeable to some other appropriation. When so used, a brief memorandum stating the emergency and the appropriation involved should be securely fastened to the transportation-request stub forwarded to the bureau. Moreover, the bureau should be advised immediately of the matter by letter, giving the number and date of the request used and the object of the travel.

FIELD PRINTING MUST NOT BE DONE WITHOUT AUTHORITY.

Section 11 of Public Act No. 314, Sixty-fifth Congress, approved March 1, 1919, provides as follows:

"All printing, binding, and blank-book work for Congress, the Executive Office, the judiciary, and every executive department, independent office, and establishment of the Government shall be done at the Government Printing Office, except such classes of work as shall be deemed by the Joint Committee on Printing to be urgent or necessary to have done elsewhere than in the District of Columbia for the exclusive use of any field service outside of said District."

The Joint Committee on Printing in its Regulations No. 3 of June 21, 1919, after granting permission for certain specified field services to have such work done elsewhere than at the Government Printing Office, orders that "no printing, binding, or blank-book work shall be done elsewhere than at the Government Printing Office for any other field service of the Government except as may be specifically authorized by the Joint Committee on Printing."

The committee in its Regulations No. 4 of July 24, 1919, authorizes the Secretary of Agriculture, within certain limits, to have urgent or necessary printing for field services done elsewhere than at the Government Printing Office during the fiscal year 1920.

As a general rule, therefore, all printing, binding, and blank-book work for the Bureau of Animal Industry must be done at the Government Printing Office. In case of emergency, when it seems necessary to have field printing done elsewhere, application must be made to the Washington office and approval obtained in advance. Telegraph may be used in urgent cases.

Vouchers for unauthorized printing can not be passed for payment.

DISCONTINUANCE OF THE USE OF BUREAU FORMS.

Frequently a form used in the field service of the bureau is discontinued or is replaced by a new form of a different number, or its number is changed. Often no formal notification of these changes is given to the field stations. The absence of this definite information is confusing to the stations and also to the employees of the storeroom. Therefore, all changes in established forms should be made the subject of an explicit notice in the Service and Regulatory Announcements. Information should be sent to the editor in such cases.

DISPOSAL OF OBSOLETE FORMS OF THE BUREAU.

Permission has been obtained from the Secretary of Agriculture to destroy or otherwise dispose of such of the accumulated obsolete and worthless files enumerated herein as are more than 3 years old and which do not form any of the permanent records of the bureau. Whenever such accumulated files can be sold as waste paper without risk of their falling into the hands of persons who might make improper use of them they should be sold and the proceeds turned in as miscellaneous receipts. In carrying out these instructions please be guided by paragraphs 9 and 23 of the Property Regulations. Any moneys received from sales should be transmitted promptly to the Washington office of the bureau in the form of post-office money order payable to A. Zappone, disbursing clerk. Files which it is clearly inadvisable to sell as waste paper (such as press copy book and other correspondence) should be destroyed.

Press copy books of correspondence to persons outside of the Bureau of Animal Industry.

Daily reports of employees from which station reports are compiled for transmission to the bureau at Washington, D. C.

Miscellaneous and general correspondence which, in the judgment and discretion of the person in charge, is obsolete and worthless and which forms no part of the permanent records of the bureau.

Requisitions for materials and supplies, the originals of which have been sent to the bureau in Washington, and correspondence pertaining thereto, which, in the judgment and discretion of the person in charge, are obsolete and worthless and form no part of the permanent records of the bureau.

FORMS DISCONTINUED OR RESTRICTED.

The following forms are obsolete and will not be carried in stock by the bureau storeroom:

V. S forms 41, 41-A, 41-B, 42, 42-A, 43, 43-A, 47, 47-G, 48, 48-A, 53, and 61.

Stocks of V. S form 50 will be used until the present supply is exhausted. This form is then superseded by a revised form, V. S form 67.

A supply of the following forms will be kept in stock, but they will be limited to those stations where conditions make their use desirable:

V. S forms 47-A, 47-B, 47-C, 47-D, 47-F.

In the future, supplies of the above-named forms will be furnished only upon requisition in the usual manner on form P-1.

RESULTS OF PROSECUTIONS FOR VIOLATIONS OF LAWS.

Penalties have been imposed in prosecutions for violations of regulatory laws, as reported to the bureau, as follows:

Louisville & Nashville Railroad Co. (2 cases), \$150 fines and \$47.34 costs.

PUBLICATIONS IN JANUARY.

[The bureau keeps no mailing list for sending publications to individual employees, but publications are sent in bulk to officers in charge for distribution to members of their forces. The number of copies sent varies with the subject or nature of the publications and the number and class of employees. Officers in charge will use their judgment and distribute publications to best advantage. So far as possible additional copies will be furnished on request.]
